**EXCEPTIONAL RELIABILITY**

![Acceleration Life Test at 40°C to 43°C Ambient](image)

Esco has used industry-accepted Highly Accelerated Life Testing (HALT) to stress test a large number of Lexicon Freezers at extreme conditions. The Lexicon freezers passed these extreme stress tests insuring a design that is optimized to protect your precious samples.

In accordance with ANSI/ASHRAE 72-2005 and ARI 1200-2006/2008 guidelines and as tested by a UL validated third party test lab, DNS USA, the Esco Lexicon ULT Freezer surpassed the performance of 5 major competitors with lower energy consumption, superior cabinet performance (as measured by warm-up time), and demonstrated a larger BTU refrigeration reserve capacity.

Superior performance, lower energy costs, better protection.

**QUALITY COMPONENTS**

All freezer components were selected from many tear-down and comparison tests. Only the most reliable components were selected.

- Danfoss® compressors are reliable and have high performance.
- Danfoss® filter drier is optimized for HFC refrigerants and uses 100% 3Å molecular sieve core for high moisture drying capacity. (Moisture equates to clogs in the system!).
- Condenser is oversized by design to provide a greater capacity for cooling.
- Condenser fans generate high airflow and have quiet operation.
- Energy-efficient high performance oil separator eliminates solid contaminants along with excess oil from the system and enhances the entire system’s performance.
- One seamless full wrap copper evaporator tube with no joints reduces any possibility of leaks in the field.
- Highly efficient corrosion resistant and pressure resistant heat exchanger used for maximum heat transfer.

Esco energy consumption is the lowest of all manufacturers’ conventional ULT freezers of similar size compared above.

LOW HEAT EMISSION TO AMBIENT

| Energy Consumption (KWh/day) at T<sub>set</sub> = -80°C |
| Esco UUS-714B-1 Heat Emission to lab space (KW) | 0.78 |
| Estimated conventional freezer heat emission (KW) | 0.92 |
| Less amount of heat emitted that needs to be removed by air-conditioner in the lab space (KWh/Day) | 3.2 |
| 10-year energy cost savings over conventional freezer in USD (based on 0.10$/KWh) | 1165.1 |

- Less heat emission than conventional ULT freezers of similar size.
- Substantial savings on air-conditioning costs.

ENVIRONMENT FRIENDLY

- Only CFC-free blowing agent is used.
- Only environmentally friendly CFC-free and HCFC-free HFC refrigerants are used.
- CFC and HCFC compounds have high impact on the ozone in the Earth’s atmosphere, whereas HFC does not contain chlorine and is not harmful to the earth’s atmosphere.
- Biodegradable, high-performance synthetic polyolester oil is used.
SUPERIOR SAMPLE PROTECTION

FAST PULL DOWN
- Pull down time is the time required to bring down the temperature of the ULT freezer from ambient to the set temperature.
- Esco Lexicon® II has a short pull down time which signifies an efficient refrigeration system.

FAST TEMPERATURE RECOVERY AFTER DOOR OPENING
- Esco Lexicon® II recovers temperature in minutes following a 1 minute door opening. Fast recovery in temperature ensures integrity of stored samples.

EXCELLENT UNIFORMITY
- Uniformity test measures the difference between the coldest spot and warmest spot in the freezer chamber when the freezer is operating at set temperature.
- Esco Lexicon® II has excellent uniformity under normal operating conditions. This guarantees that all samples are at the correct temperature.

EXTENDED WARM-UP TIME DURING A POWER FAILURE
- Warm-up time measures the time taken for temperature to rise up (from -80°C to -50°C) when the power is interrupted.
- With a robust insulation system in place, Esco Lexicon® II has the best warm-up time among the freezers compared on the right. Slower warm-up during an extended power failure buys the user time for carrying out a back-up plan.
LARGE RESERVE CAPACITY

- Reserve capacity test records the lowest temperature the freezer is able to sustain when a heat source is placed in the freezer. This resembles real life situations when hot samples are placed in the freezer. The lower the temperature the freezer can sustain, the higher chance the freezer can maintain the set temperature when warm samples are placed in the freezer.
- Esco reserve capacity surpasses that of all major brands tested below.

LOW NOISE OPERATION

- According to OSHA 1910.95 Occupational Noise Exposure Regulation, the sound level of the work place has to fall below 90 dBA for an employee who works 8 hours/day.
- Total noise in a lab is highly dependent upon the equipment that emits the greatest amount of noise.
- Esco Lexicon® II ultra-low freezer has a noise level of approximately 56 dBA. This ensures a quiet and pleasant working environment for lab users.

EASY TO SERVICE

- Embedded thermocouples in the foam for easy field troubleshooting.
- Filter driers are located at the deck for easy replacement.
- Adjustable main door hinge and latch.
- Condenser filter is conveniently located at the front of the freezer. This allows easy access for inspection, cleaning and/or changing.
- 5-year warranty on compressors, 5 years on complete system.

TESTING AND CERTIFICATION

The Esco Lexicon Ultra-Low Temperature Freezer is listed by Underwriters Laboratory (UL), to meet the requirements of both the U.S. and Canada standards for electrical/mechanical integrity.
INTELLIGENT DESIGN

EFFECTIVE COOLING TECHNOLOGY

HeatRecycler™ Technology allows efficient recycling of the heat generated by the system. This reduces power consumption and prolongs the life of the freezer.

- 2-Stage cascade refrigeration system.
- Two fans are employed to draw consistent airflow from the front to the back of the freezer to cool the condenser.
- Two 1-hp hermetic compressors operated at a low speed for longer life.
- The compressors sit directly behind the fans and are air-cooled for better operating conditions.

SUPERIOR INSULATION SYSTEM

Maximum product protection is provided by Lexicon's superior insulation system.

- 5” thick polyurethane foam is placed in the main cabinet and 4.5” on the door.
- Triple gasket seal protects against thermal leaks and prevents frost build-up.
- HeatRecycler™ Technology allows efficient recycling of the heat generated by the system. This reduces power consumption and prolongs the life of the freezer.

QUICKOPEN™ FAST DOOR RE-OPEN SYSTEM

Esco designed Pressure Equalization Port (PEP) to relieve the vacuum that is formed inside the chamber after door opening. PEP is temperature-controlled to prevent ice formation on the port.

- Ergonomically designed door handle allows one-handed door opening.
GOLD CONTROLLER - a powerful controller with more advanced features

- Simple, intuitive operation
- Large display of actual temperature with a simultaneous display of set temperature and ambient temperature
- USB interface allows transfer of temperature data and the last 20 system events
- Includes Automatic Voltage Regulator that maintains a constant voltage level and protects critical freezer components. Additional sample protection!
