EXCEPTIONAL RELIABILITY

Esco has used industry-accepted Highly Accelerated Life Testing (HALT) to stress test a large number of Lexicon Freezers at extreme conditions. The Lexicon freezers passed these extreme stress tests insuring a design that is optimized to protect your precious samples.

In accordance with ANSI/ASHRAE 72-2005 and ARI 1200-2006/2008 guidelines and as tested by a UL validated third party test lab, DNS USA, the Esco Lexicon ULT Freezer surpassed the performance of 5 major competitors with lower energy consumption, superior cabinet performance (as measured by warm-up time), and demonstrated a larger BTU refrigeration reserve capacity.

Superior performance, lower energy costs, better protection.

QUALITY COMPONENTS

All freezer components were selected from many tear-down and comparison tests. Only the most reliable components were selected.

- Danfoss® compressors are reliable and have high performance.
- Danfoss® filter drier is optimized for HFC refrigerants and uses 100% 3Å molecular sieve core for high moisture drying capacity. (Moisture equates to clogs in the system!).
- Condenser is oversized by design to provide a greater capacity for cooling.
- Condenser fans generate high airflow and have quiet operation.
- Energy efficient high performance oil separator eliminates solid contaminants along with excess oil from the system and enhances the entire system’s performance.
- One seamless full wrap copper evaporator tube with no joints reduces any possibility of leaks in the field.
- Highly efficient corrosion resistant and pressure resistant heat exchanger used for maximum heat transfer.
**LOW ENERGY CONSUMPTION**

- **Average Power Consumption (KWh/day)**
  - Competitor S: 24.6
  - Competitor L: 28.6
  - Competitor H: 24.5
  - Competitor T: 23.8
  - Competitor TS: 19.9
  - Esco UUS-714A-1: 15.81

Energy Consumption (KWh/day) at $T_{amb} = 80^\circ C$

- Esco UUS-714A-1-SS or UUS-714A-1 energy usage (KWh/day): 15.81*
- Estimated conventional freezer energy usage (KWh/day): 24.3**
- 10-year energy cost savings over conventional freezer in USD (based on 0.10$/KWh): 3,099
- 10-year carbon footprint reduction over conventional freezer in kg CO$_2$ (0.58 kg CO$_2$/KWh): 17,973

*Esco energy consumption is the lowest of all manufacturers’ conventional ULT freezers of similar size compared above*.

**LOW HEAT EMISSION TO AMBIENT...**

- Esco UUS-714A-1 Heat Emission to lab space (KW): 0.78
- Estimated conventional freezer heat emission (KW): 0.92
- Less amount of heat emitted that needs to be removed by air-conditioner in the lab space (KWh/Day): 3.2
- 10-year energy cost savings over conventional freezer in USD (based on 0.10$/KWh): 1165.1

- Less heat emission than conventional ULT freezers of similar size*.
- Substantial savings on air-conditioning costs.

**ENVIRONMENTALLY FRIENDLY**

- Only CFC-free blowing agent is used.
- Only environmentally friendly CFC-free and HCFC-free HFC refrigerants are used.
- CFC and HCFC compounds have high impact on the ozone in the Earth’s atmosphere, whereas HFC does not contain chlorine and is not harmful to the earth’s atmosphere.
- Biodegradable, high-performance synthetic polyolester oil is used.
**SUPERIOR SAMPLE PROTECTION**

**FAST PULL DOWN**
- Pull down time is the time required to bring down the temperature of the ULT freezer from ambient to the set temperature.
- Esco Lexicon® has a short pull down time which signifies an efficient refrigeration system*.

**FAST TEMPERATURE RECOVERY AFTER DOOR OPENING**
- Esco Lexicon® II recovers temperature in minutes following a 1 minute door opening*. Fast recovery in temperature ensures integrity of stored samples.

**EXCELLENT UNIFORMITY**
- Uniformity test measures the difference between the coldest spot and warmest spot in the freezer chamber when the freezer is operating at set temperature.
- Esco Lexicon® II has excellent uniformity under normal operating conditions*. This guarantees that all samples are at the correct temperature.

**EXTENDED WARM-UP TIME DURING A POWER FAILURE**
- Warm-up time measures the time taken for temperature to rise up (from -80°C to -50°C) when the power is interrupted.
- With a robust insulation system in place, Esco Lexicon® II has the best warm-up time among the freezers compared on the right*. Slower warm-up during an extended power failure buys the user time for carrying out a back-up plan.
LARGE RESERVE CAPACITY

- Reserve capacity test records the lowest temperature the freezer is able to sustain when a heat source is placed in the freezer. This resembles real life situations when hot samples are placed in the freezer. The lower the temperature the freezer can sustain, the higher chance the freezer can maintain the set temperature when warm samples are placed in the freezer.
- Esco reserve capacity surpasses that of all major brands tested below.

![Graph showing BTU Reserve Average of 16 Probes**](image)

LOW NOISE OPERATION

- According to OSHA 1910.95 Occupational Noise Exposure Regulation, the sound level of the work place has to fall below 90 dBA for an employee who works 8 hours/day.
- Total noise in a lab is highly dependent upon the equipment that emits the greatest amount of noise.
- Esco Lexicon® II ultra-low freezer has a noise level of approximately 56 dBA*. This ensures a quiet and pleasant working environment for lab users.

EASY TO SERVICE

- Embedded thermocouples in the foam for easy field troubleshooting.
- Filter driers are located at the deck for easy replacement.
- Adjustable main door hinge and latch.
- Condenser filter is conveniently located at the front of the freezer. This allows easy access for inspection, cleaning and/or changing.
- 5-year warranty on compressors, 5 years on complete system.

*Units were factory tested under controlled environmental conditions per Esco method. Esco does not guarantee identical results in the field under differing conditions. Original report available upon request. UUS-668A-1 units were used for all the tests above.

**Performance data are available upon request.

TESTING AND CERTIFICATION

The Esco Lexicon Ultra-Low Temperature Freezer is listed by Underwriters Laboratory (UL), to meet the requirements of both the U.S. and Canada standards for electrical/mechanical integrity.
INTELLIGENT DESIGN

EFFECTIVE COOLING TECHNOLOGY

HeatRecycler™ Technology allows efficient recycling of the heat generated by the system. This reduces power consumption and prolongs the life of the freezer.

- Two additional “heat exchangers” to channel heat energy.
- “Mullion heater” recycles excess heat from 1st stage compressor to heat up main door gasket. This prevents ice from forming on the gasket and provides easy door closing.

SUPERIOR INSULATION SYSTEM

Maximum product protection is provided by Lexicon’s superior insulation system.

- Outer wall
- Insulation
- Inner chamber wall

Triple gasket seal protects against thermal leaks and prevents frost build-up.

5” thick polyurethane foamed in place in the main cabinet, 4.5” on the door.

QUICKOPEN™ FAST DOOR RE-OPEN SYSTEM

Esco designed Pressure Equalization Port (PEP) to relieve the vacuum that is formed inside the chamber after door opening.

- Pressure Equalization Port (PEP)
- PEP is temperature controlled to prevent ice formation on the port.

Ergonomically designed door handle allows one-handed door opening.

VOYAGER® SOFTWARE - CENTRAL CONTROL AND MONITORING SYSTEM
Extra Protection for Your Sample

- Lexicon® II freezers with the Aalto controller can communicate with Voyager® via RS485 connection.
- All information is kept securely inside the facility firewall. Once connected, Voyager® can notify users from a central location of any freezer alert or condition that can threaten sample safety or integrity.
- Voyager® can communicate with the available intelligent Remote Monitoring Application Protocol service (iRMAP).

INTELLIGENT REMOTE MONITORING APPLICATION PROTOCOL (IRMAP) SERVICE

- With iRMAP optional service, Esco will remotely monitor your Esco freezers in case of issues that might threaten your samples, Esco will call the supplied customer contact to provide assistance.
- iRMAP allows Esco to guard your samples 24 hours a day/7 days a week. Esco can even provide proactive service response if the predictive failure monitoring system finds a fault in your Esco freezer.
- If the user elects to transmit data outside of their facility, then Voyager® will encrypt the data twice and allow the freezer data to be monitored by iRMAP services at the Esco monitoring headquarters.
